Philippines QA Services

2025

AMBER PHILIPPINES

For Us, Work and Play Are One and the Same

Located in the heart of Bonifacio Global City, our Manila branch thrives on a dynamic culture that blends creativity, productivity, and passion.

Our workspace is designed to be fun and engaging, where ideas flow freely and creativity flourishes. From collaborative team projects to moments of levity that bring us closer together, we create a culture where both work and play are equally valued.

While we embrace a lively atmosphere, we remain deeply committed to excellence. With a focus on continuous improvement and innovation of our processes through extensive feedback, our talented Manila team has provided exceptional services to 30+ satisfied clients and 40+ titles since its inception, consistently delivering results that exceed expectations.

The Team

Our team is built on a foundation of expertise, dedication, and a deep understanding of both our clients' and our people's needs. Each member brings a wealth of experience in QA, developed through rigorous training and hands-on work with diverse projects.

Beyond results, we understand that our people are our greatest asset. We invest in their growth, provide them with the tools they need, and create an environment where they can thrive. This combination of skill, commitment, and people-centered focus is what drives our success and the long-term satisfaction of our clients.

By the Numbers

Since opening our doors in 2022, we've grown into a thriving team of talented professionals, consistently exceeding expectations with innovative solutions and exceptional service.

Backed by a diverse portfolio of successful partnerships, we've earned a reputation for reliability and excellence by seamlessly bridging global distances to ensure our clients are always ahead of the game.

2022

the Manila branch was established.

40+

titles our team has worked on.

30+

clients serviced in our branch thus far.

24/5

coverage in all timezones.

WHAT MAKES US DIFFERENT?

Driving Results Through Expertise and Independence

At the core of our success is a culture that values both expertise and empowerment. We invest heavily in world-class training for our testers, ensuring they stay ahead of industry trends and best practices. But beyond training, we trust our team with the autonomy to make critical decisions, innovate, and drive projects forward. This balance of structured learning and creative freedom has proven to be a winning formula, enabling our testers to deliver higher quality output with confidence and precision, time and time again.

WE DO IT FOR THE LOVE

Passion Fuels Our Craft

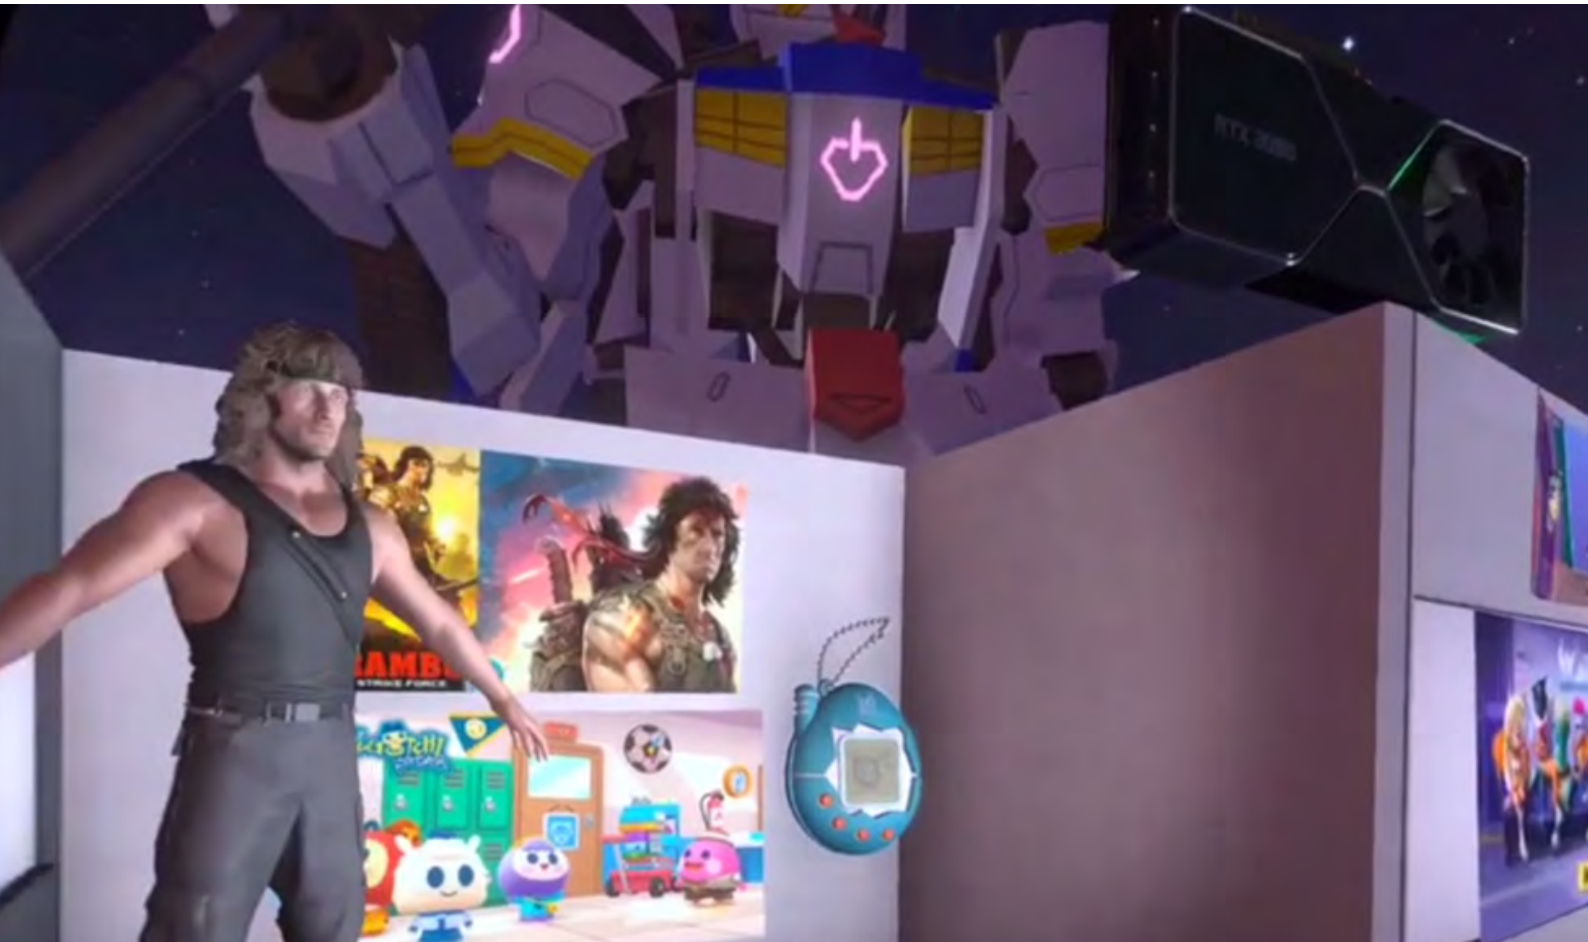
Our work goes beyond simply testing—we live and breathe the gaming experience. As gamers ourselves, we understand the nuances and intricacies that make a game not just good, but great. This deep connection to our craft is what sets us apart. Whether it's catching that tiny bug that could break immersion or suggesting improvements that enhance gameplay, our passion drives us to go above and beyond. We don't just play games, we dissect them, immerse ourselves in their worlds, and work tirelessly to elevate them.

At the same time, we thrive on the process of making these games the best they can be. It's this excitement for both playing and perfecting games that makes our QA process more than just a job—it's a calling. By combining our love for gaming with meticulous testing, we ensure that every project we touch meets the highest standards of quality, delivering an experience that gamers worldwide will love.

We Do It Well, and We Know How to Have Fun While We’re at It

Our team knows how to hit the mark with precision, yet we believe that enjoying what we do is just as important. With a mix of serious dedication and light-hearted energy, we tackle challenges confidently, making room for creativity and teamwork to shine. It’s this blend of skill and spirit that sets us apart, driving us to deliver quality while genuinely loving what we do.

Our team took creativity to the next level by designing an immersive, 1:1 virtual model of our Manila office. This VR space goes beyond a simple replica—each area reflects unique touches and imaginative elements added by our colleagues, showcasing their personal flair and vision. From reimagined workspaces to fun and unexpected surprises, the virtual office captures both the layout and the vibrant spirit of our real-life environment. It’s an interactive experience that brings our workspace to life in a fresh way, blending familiarity with a dash of creativity, and making it a place everyone is excited to explore and personalize.



What Our Partners Say About Our Work

From our 2023 PARTNER SATISFACTION SURVEY (PSAT)

Exemplary Thoroughness

“Amber’s QA team consistently demonstrates comprehensive and meticulous attention to all assigned tasks and tests, quickly addressing any uncertainties and maintaining open, clear lines of communication throughout the entire process.”

Outstanding Responsiveness

“I was impressed by the team's quick and reliable response times to requests which demonstrates their commitment to efficiency.”

More Than Just Testers

“Their team possesses a deep understanding of Game Knowledge & Processes which often leads to them acting as consultants for when there are lapses in the game documentation or behaviors in-game.”

CASE STUDY - INTERNAL INNOVATION

Python Parser

As part of our benchmarking team, our testers compile performance data which previously took over an hour for each device to complete. They developed parsers using Python to automate the process and reduce data compiling time to only 40 minutes, allowing us to cover more devices and increasing our efficiency.

50%

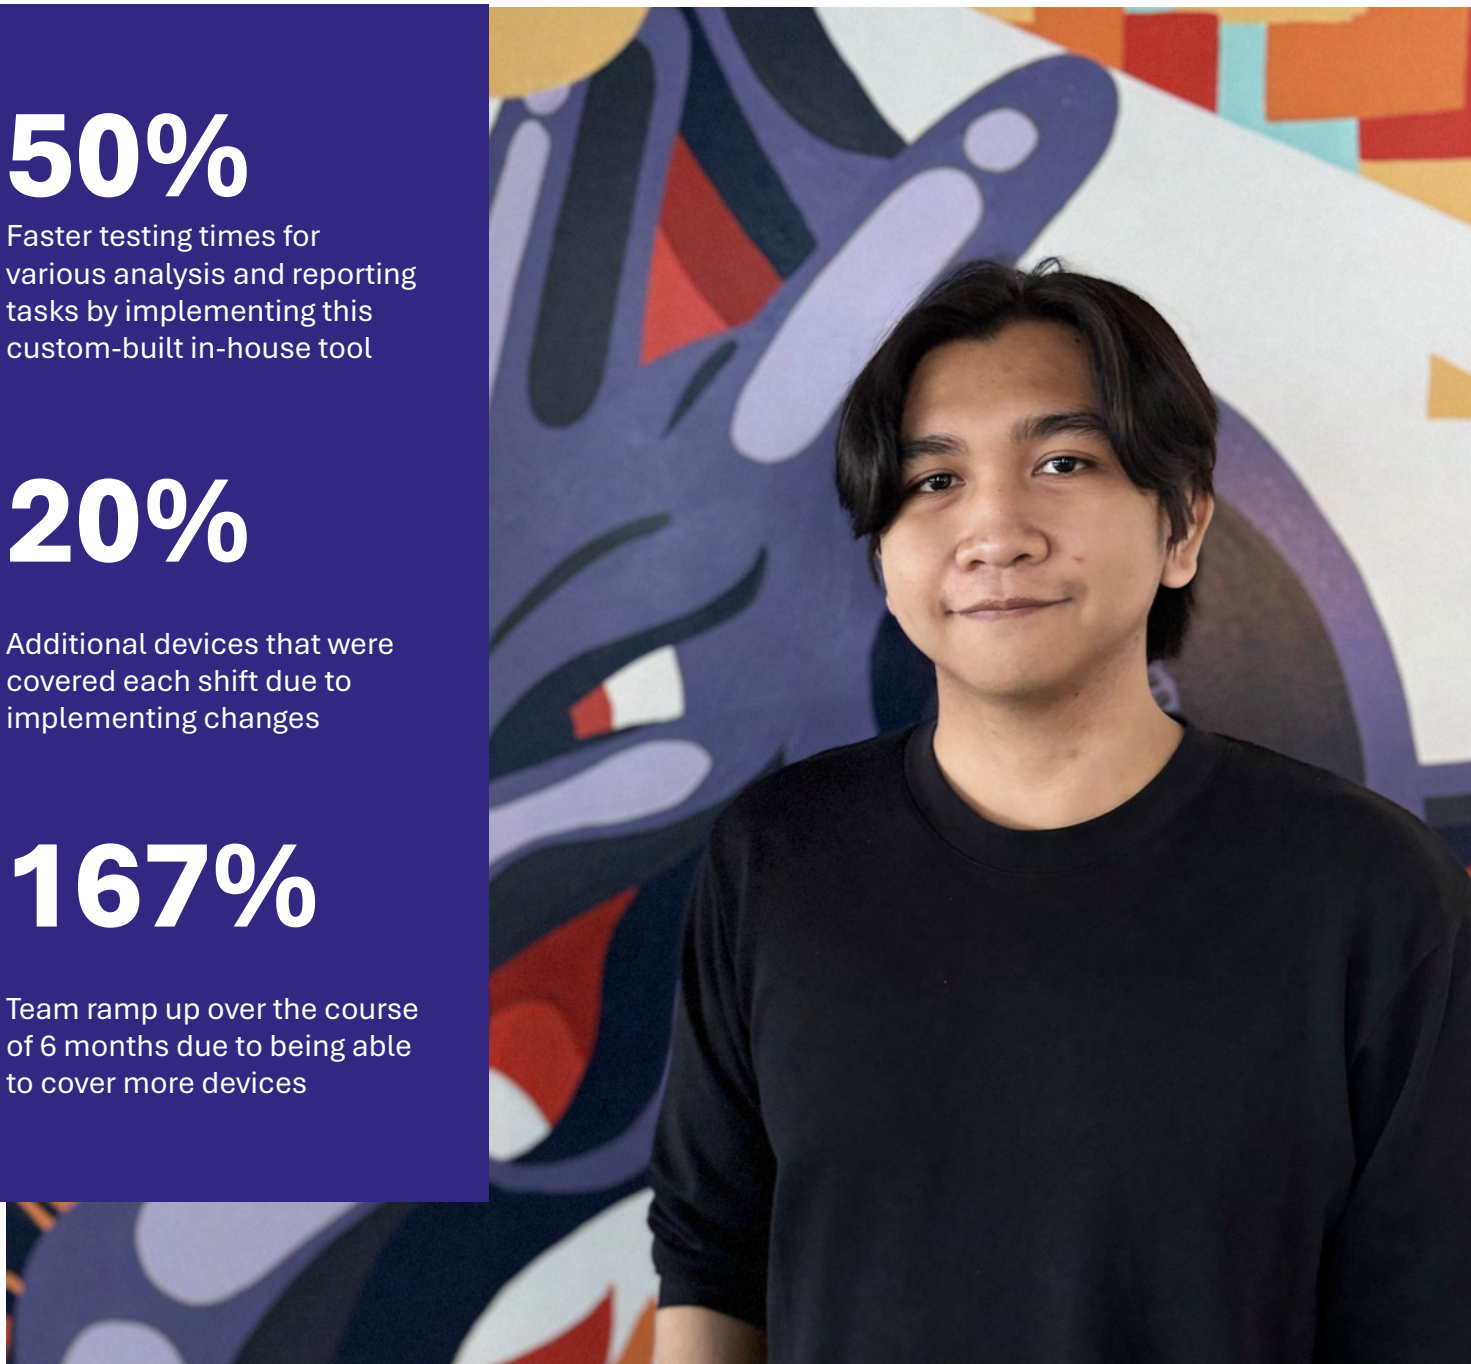
Faster testing times for various analysis and reporting tasks by implementing this custom-built in-house tool

20%

Additional devices that were covered each shift due to implementing changes

167%

Team ramp up over the course of 6 months due to being able to cover more devices



CASE STUDY - PROCESS IMPROVEMENTS

Documentation

When new tasks are introduced to our teams, different kinds of test sheets were proposed to accommodate the request. Our team would explain the different benefits for each test sheet in terms of visibility and readability of test results. Eventually, they were given freedom by our partner to create test sheets for future tasks which increased overall efficiency and allowed us to generate more useful test case planning methodologies.

The team proactively created documentation to track changes in tasks and processes, allowing any of its members to run tasks with up-to-date info.

This removes the dependency on specific testers and allows us to cover for those who are not present.

AMBER PHILIPPINES

Your Investment

Partnering with us means accessing one of the absolute best QA services in the industry, delivering unparalleled quality at a price point that is hard to match and with the most enthusiastic staff.

Backed by a diverse portfolio of globally recognized clients who trust us with their most critical projects. With our blend of top-tier talent, comprehensive expertise, and cost-effective solutions, we guarantee that your investment in us will deliver exceptional value and proven success every time.

Let’s Get To Work Together

Our Amber Philippines team combines **competitive pricing** with highly educated, English-proficient **professionals**, delivering **quality with a creative edge.**

In an environment that champions innovation, we are equipped to **provide superior QA services** tailored to your project needs at any time.

AMBER

AMBER is an international, preferred game development partner specializing in a diverse range of platforms and genres.

We are evolving the art and science of play by operating on a scaled-up, vertically integrated organizational model to achieve mastery in the full set of game development specializations.

Our global network of multidisciplinary studios functions like an integrated hub, offering a full range of turn-key product development solutions, including concept-to-delivery game production, live operations, co-development, art production, and support services such as QA or localization.

We have deep expertise in product development, cross-platform deployment, parallel launch strategies, user experience optimization, free-to-play monetization systems, data science, live operations, and more.
